HighTech Components for Water Treatment

At Aquatech Amsterdam 2015, UV-Technik Speziallampen GmbH will be presenting its High-End-Components for industrial UV-applications

This year, Aquatech Amsterdam is again one of the most important trade shows for the industrial water treatment market. This makes it a great platform for market launches and product presentations from UV-Technik Speziallampen GmbH. As a member of the internationally successful Hönle Group, the company develops, manufactures and sells UV-lamps, electronic ballasts, UV-sensors and other related UV components. This UV-specialist has offered **trend-setting component solutions for water and air treatment systems** for nearly 25 years.

In addition the company will be presenting its customized products for air and water disinfection, which are used in highly automated production lines all over the world and are well-known for the highest level of reliability. The main focus is concentrated on applications in **drinking water, waste water and ballast water installations.**

Further trade show highlights are the numerous new and sophisticated developments of UV-Technik Speziallampen GmbH. Among them the **electronic power supplies from the EPS-series and the MLC-Rack**, a high-end solution for large installations. This rack system guarantees a very high system efficiency in operation and detailed monitoring of all UV parameters during the whole treatment process.

Press release

Wolfsberg, September 2015

Moreover, **ATEX-IIB and ATEX-IIC sensors** to control the UV-power in explosive atmosphere will be presented. These are used, for example, in oil platforms, tank vessels and the mining industry.

To experience our wide product portfolio and our enormous breadth of application possibilities, **please visit UV-Technik Speziallampen GmbH at Aquatech Amsterdam, Hall 6, Stand 06.204.**

About UV-Technik Speziallampen GmbH: Since 1991, the Companies expertise has been in customized UV-components. From UV and IR-lamps via electronic ballasts to UV-sensors, UV-Technik Speziallampen GmbH offers a wide range of innovative products. The R&D department along with production facilities and the sales department are located in Wolfsburg, Germany.

About the Hönle Group: In addition to the original parent company, UV systems specialist Dr. Hönle AG, the Hönle Group also comprises of sheet-offset specialists Eltosch Grafix (UV/IR/hot-air dryers and peripheral units, e.g. ink fixation) and the UV specialist for rotary printing PrintConcept. Raesch are experts in the glass division and lamp manufacturing (customized quartz glass components), UV-Technik Speziallampen (lamp manufacturing, e.g. for disinfection) and Aladin (UV lamp manufacturing). Further subsidiaries are the specialists for professional lightning technology, Mitronic, as well as the adhesives specialist Panacol.

The German based Hönle Group has local subsidiaries in China, France, Spain and the USA as well as sales offices in Italy and the Netherlands. The Hönle Group also has an extensive worldwide network of experienced sales and service partners.
